EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption.* The term "*entry for consumption*" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

Kinds, quantities, and values, how ascertained.—The kinds and quantities of all imported merchandise, free from duty, are ascertained by entry, made upon oath or affirmation by the owner, or by the consignee or agent of the importer, or by actual examination where the collector shall think such examination necessary; and the values of all such merchandise are ascertained in the same manner in which the values of imports subject to duties ad valorem are ascertained.

The values of all imported articles subject to specific duties shall be ascertained in the manner in which the values of imports subject to duties ad valorem are ascertained.

The value of merchandise imported since August 5, 1909, subject to ad valorem rates of duty and duty imposed upon and regulated in any manner by the value thereof, shall be "the actual market value or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported; that such actual market value shall be held to be the price at which such merchandise is freely offered for sale to all purchasers in said markets, in the usual wholesale quantities, and the price which the manufacturer or owner would have received, and was willing to receive, for such merchandise when sold in the ordinary course of trade in the usual wholesale quantities, including the value of all cartons, cases, crates, boxes, sacks, casks, barrels, hogsheads, bottles, jars, demijohns, carboys, and other containers or coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States. (Rev. Stats. 336, secs. 18 and 11 of the act of June 10, 1890, as amended by act of August 5, 1909, sec. 28, and Customs Regs., 1908, art. 1604.)

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products of manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports*. The official values of the articles therein represented are the same as the *import values.*

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the Bureau the measures of quantity are as follows, unless indicated otherwise: Ton, 2,240 pounds; hundredweight, 112 pounds. Number of pounds to the barrel—Wheat flour, rye flour, and cornmeal, 196 pounds net weight; rosin, tar, and turpentine, 280 pounds net; fish, pickled, 200 pounds net; cement, 380 pounds net (counting 4 bags to the barrel). Number of pounds to the bushel is as follows: Wheat, beans, and potatoes, 60 pounds; barley and buckwheat, 48 pounds; corn, rye, and flaxseed, 56 pounds; onions, 57 pounds; oats, 32 pounds; malt, 34 pounds; Brazil nuts, 62 pounds.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

COMMERCE OF THE PHILIPPINE ISLANDS.
COMMERCE OF GUAM AND TUTUILA.
RECAPITULATION OF COMMERCE OF NONCONTIGUOUS TERRITORIES.
TONNAGE MOVEMENT IN THE TRADE OF THE UNITED STATES WITH ITS NONCONTIGUOUS TERRITORIES.

COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

INTERNAL COMMERCE OF THE UNITED STATES.

MORRIS JACOBSON, *Internal Commerce Expert.*

OCTOBER SUMMARY OF INTERNAL TRADE MOVEMENTS.

The summary of Internal Commerce for October, 1910, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for October and the ten months of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; and VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, and petroleum, and pig-iron production; IX. Ocean freight rates; and X. Changes in rail freight rates.

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations and demurrage bureaus. Twenty-six different associations and demurrage bureaus report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for October and ten months of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise; and by trunk-line shipments of flour, grain, and provisions from Chicago. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENTS.

This movement includes receipts and shipments for October and ten months at important interior markets for three successive years For receipts of live stock at other markets whose operations are reported in this issue reference should be made to the general trade movement of these sections.

Commercial Movements of Live Stock at Interior Markets during October and Ten Months ending October, 1908–1910.

GRAIN MOVEMENTS AT INTERIOR MARKETS.

This movement includes receipts and shipments of grain, flaxseed, and flour, as reported to the bureau by the commercial organizations of the respective cities. It should be noted that the methods used in recording the movement vary in the different cities. Thus, receipts at Chicago and St. Louis include through business. Part of the through business may be actually handled at these points. (In such cases the proportion of the through rate is paid and the balance used on what is known as "tonnage for shipments" on other cars of grain.) In some markets receipts include all grain billed direct to the respective market, whether reconsigned after receipt or not. This is true of receipts at Milwaukee, Cleveland, Cincinnati, and Omaha. In other markets the local produce or grain exchanges report as receipts all grain inspected inward by their inspectors, including small quantities not unloaded and forwarded. This is the case in Detroit, Toledo, and Kansas City. Other markets, such as Duluth, Minneapolis, Little Rock, and Louisville, make a strict distinction between purely local business, i. e., quantities actually unloaded at local elevators or warehouses, and mere car arrivals or quantities billed to local consignees. Equally varying are the practices of the different organizations in classing and reporting shipments, which in the case of Chicago and St. Louis include through shipments; in some cities all quantities forwarded or rebilled, even if not unloaded; and in other cities shipments out of local elevators and warehouses or from local wharves or piers. This lack of uniformity naturally results in a considerable degree of duplication and even reduplication, and this fact is to be borne in mind when comparisons between various markets are made.

GRAIN MOVEMENTS FOR CROP PERIODS.

In the following table an attempt is made to present grain movements at interior primary markets in such a manner as to permit of an intelligent study of the effect of each year's production upon such movements. While it is recognized that the selection of the same date as the beginning of the crop year for the various grains must be more or less arbitrary, owing to the appreciable difference in time and place of the maturing and harvesting of the different cereals, it is nevertheless believed that a given period may be used which, although both over and under lapping in certain instances, is comprehensive enough to answer all practical purposes, especially where figures representing movements for cumulative periods of two or more months are employed. To make possible, therefore, the presentation of such information in a single table, September 1 has been decided upon as the fairest arbitrary date marking the beginning of the common crop year.

II.—DOMESTIC COMMERCE OF THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between the domestic ports during the month of October and ten months ending with October. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During the month of October transactions at 139 ports of receipt and 197 ports of shipment were reported. The number of vessels arriving in October was 8,406 and the departures numbered 8,224 vessels. The registered tonnage for the month was as follows: Arrivals, 13,123,172 net tons; departures, 12,709,119 net tons. This total does not include the tonnage of vessels engaged in trade between the United States and Canada.

SUMMARY OF DOMESTIC LAKE TRAFFIC, OCTOBER AND TEN MONTHS ENDING OCTOBER, 1908-1910.

A summary of the lake traffic for October, compared with the corresponding months in 1908 and 1909, is given in the following table. The various quantities and units of freight are reduced to their equivalents in short tons. October receipts in 1910 at all ports reporting were 10,936,641 short tons, compared with 11,799,353 short tons in October, 1909, and 9,872,578 short tons in October, 1908. The figures of shipments of coal include coal loaded for vessels' fuel consumption.

[a] Does not include coal supplied to vessels for their own fueling purposes. For particulars regarding quantities of bunker coal supplied to vessels in the domestic trade at lake ports, see page 643.

In the above table Detroit commerce was treated as part of Lake Erie commerce; the Lake Huron figures include all the commerce north of Detroit and south of Sault Ste. Marie.

[a] There was no commerce on the canal during February.

[b] Does not include tonnage of tugs, nor that of vessels towed.

Merchandise transported between United States points, but passing, under bond, through Canadian territory, is known as "in-transit" movement. That class of tonnage which required the use of the Great Lakes as a link in its journey in October, 1910, consisted of the following: Receipts at Ashtabula, 82 short tons unclassed freight; Chicago-South Chicago, 8,008 short tons unclassed freight; Conneaut 21 short tons flour; and Milwaukee, 2,174 short tons unclassed freight. Shipments from Ashtabula, 8 short tons flour, 60 bushels corn, and 198 short tons unclassed freight; Chicago-South Chicago, 35 short tons flour, 937,710 bushels corn, 69,342 bushels oats, and 1,174 short tons unclassed freight; Conneaut, 150 short tons iron manufactures and 191 short tons soft coal; Superior-West Superior, 16,189 bushels wheat and 69,517 bushels oats.

The total "in-transit" movement for October, 1910, was 150 short tons iron manufactures, 191 short tons soft coal, 64 short tons flour, 16,189 bushels wheat, 939,770 bushels corn, 138,859 bushels oats, and 11,636 short tons unclassed freight.

III.—COMMERCIAL MOVEMENTS AT THE NORTH ATLANTIC SEABOARD.

The territory covered by these movements includes the Atlantic coast south as far as Baltimore, Md. The operations reported include the receipts and shipments of live stock, flour, and grain for October and ten months at the North Atlantic ports of Boston, New York, Philadelphia, and Baltimore, miscellaneous receipts at New York, and tobacco receipts and stocks at principal eastern markets.

Receipts of Live Stock at Boston, New York, Philadelphia, and Baltimore, 1909 and 1910.

GRAIN RECEIPTS AT SIX DOMESTIC SEAPORTS.

Below is given a comparative table of receipts of grain, including flour reduced to bushels, at six seaboard markets, during October and ten months ending October, 1908, 1909, and 1910. The figures are derived in every case from the reports of the commercial organizations closely identified with the grain trade at the respective localities. These totals serve to show the relative share of each port in this branch of domestic commerce.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section usually includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coal shipments by water from New York, Philadelphia, Baltimore, Norfolk, and Newport News to seaboard points north and south; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from sources of origin, and coastwise and foreign shipping movements at Boston, New York, Philadelphia, and Mobile. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented. Coastwise shipments of petroleum from Texas producing territory to Atlantic and Gulf ports are given in Section VIII. Representative freight rates quoted to leading destinations on the eastern and southern coasts are shown in Section IX.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, AND NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the Middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk, and Atlantic, Gulf, and Pacific coast ports the following figures of the coastwise coal movement have been obtained. These statistics cover probably more than 90 per cent of the shipments for the places and periods mentioned, and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia, shipments are primarily bituminous and secondarily anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio rivers and east of the Mississippi River and that portion west of the Mississippi included in the States of Louisiana, Oklahoma, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities.

Cotton reports include the statements of the quantity of the crop ginned, brought into sight, and its disposition during successive crop years to the end of August. Other articles of traffic reported are the grain and rice movements at New Orleans, shipments of yellow pine from the Southwest and from Virginia and the Carolinas to destinations, and river and rail traffic at Louisville, Ky., and Little Rock, Ark. Southern river trade is given in Section VII, southern coastwise shipments under Section IV.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac rivers for shipment direct to northern and eastern mills; and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

Sight Receipts, Port Receipts, Overland Movement, and Distribution of Cotton, September 1 to October 31, 1908–1910.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; redwood-lumber shipments from upper California, arrivals of redwood, pine, and fir at California coast points; lumber shipments from the Pacific Northwest States and from principal northern Pacific ports; commerce at the ports of Portland, Seattle, and Tacoma; and the shipments of citrus fruit from southern California.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburg, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi rivers; the traffic movements on the Delaware and Chesapeake Canal, connecting the Chesapeake and Delaware bays, and similar movements on various navigable streams about whose navigation acceptable information is periodically available.

Unless otherwise specified the data out of which the following tables are constructed are derived from monthly reports received from the engineers in charge of river and harbor improvements under the auspices of the War Department:

The maximum tonnage on the Big Sandy River for October, 1910, was at Lock No. 2, where 3,409 tons of freight passed.

The maximum tonnage on the Black Warrior River for October, 1910, was at Lock No. 5, where 5,928 tons of freight passed, of which 80 tons were coal and 5,848 were miscellaneous merchandise.

The maximum tonnage on the Coosa River for October, 1910, was at Lock No. 3, where 100 tons of freight passed.

The maximum tonnage on the Cumberland River for October, 1910, was at Lock No. 2, where 4,906 tons of freight passed.

Upstream tonnage on the Kentucky River during October, 1910, was largest at Lock No. 2, where 3,647 tons of freight passed, of which 3,175 tons were coal and 472 tons were miscellaneous merchandise. Downstream tonnage at Lock No. 5 aggregated 1,507 tons of miscellaneous freight. The grand total freight passing in both directions at locks of maximum tonnage was 5,154 tons.

Upstream tonnage on the Muskingum River during October, 1910, was largest at Lock No. 10, where 1,743 tons of freight passed, of which 17 tons were lumber and 1,726 tons miscellaneous merchandise. Downstream tonnage was largest at Lock No. 10, where 2,265 tons of freight passed, of which 100 tons were lumber, 90 tons were coal, and 2,075 tons merchandise. The grand total freight passing in both directions at locks of maximum tonnage was 4,008 tons.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing downstream through Lock No. 3, plus 33,473 short tons mined in the first and second pools, makes a total coal traffic of 701,073 short tons. This total, plus 3,629 short tons of miscellaneous merchandise which passed through Lock No. 3 during the month, represents approximately the general aggregate of downstream traffic during October, 1910—704,702 short tons.

The total freight moved in both directions, on this basis of calculation, was 871,634 short tons in October, 1910, as against 1,000,092 short tons in October, 1909, and 764,363 short tons in October, 1908.

For ten months ending with October the total movement was 9,233,802 short tons in 1910, 9,537,608 short tons in 1909, and 8,085,960 short tons in 1908. Of upstream freight, that passing through Lock No. 1 represents approximately the general movement in this direction. The upstream freight passing this point for ten months ending October amounted to 1,122,101 short tons.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and departures are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For the ten months ending with October, 1910, of the vessels reported, 1,137 were loaded with coal; 341 carried lumber, logs, piling, and wood; 197 carried ties; 468 carried merchandise; 15, brick; 35, oil; 14, steel; 10, wheat; 1, corn; 65, rock; and 2 molasses.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON,

The series of tables following present some of the leading traffic operations in domestic coal, coke, and petroleum; also figures of pig-iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke shipments east of Pittsburg and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore and Ohio Railroad, the Chesapeake and Ohio Railway, the Norfolk and Western Railroad, and other eastern roads; weekly Connellsville coke output and shipments; St. Louis receipts of coal. Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima-Indiana, and Mid-Continent fields. Statistics of pig-iron production cover the principal producing districts, and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MID-CONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Mid-Continent field includes Kansas and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude from southeastern Ohio and Lima-Indiana crude from northwestern Ohio; the Indiana Pipe Line Company, which receives crude from Indiana and Illinois; and the Prairie Oil and Gas Company, which operates in the Mid-Continent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude, and its Lima-Indiana crude was reported jointly with that of the Indiana pipe line. Also, prior to this date, the pipe line distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and for which they are liable. In addition, the pipe lines hold a certain amount of sediment and surplus oil, which, combined with net stocks, constitute gross stocks.

IX.—OCEAN FREIGHT RATES.

The monthly range in ocean freight rates on staple products, for comparative periods of two years, between important Atlantic and Gulf ports and Europe, is shown in tables for Boston, New York, Baltimore, and New Orleans. In the Baltimore table, unless otherwise specified, rates in United States currency are in cents per 100 pounds, and those in English sterling per long ton of 2,240 pounds.

Range of Ocean Freight Rates from Boston, Mass., to European Ports during October, 1909 and 1910.

X.—CHANGES IN RAILROAD FREIGHT RATES.

Changes in railroad freight rates are obtained through the courtesy of the Interstate Commerce Commission, the auditor of that body transmitting them on the latest date which will permit of their insertion in the Summary. In this manner their publication is assured as soon after their receipt as possible, and as a rule they cover a period nearly a month later than that represented by other statements throughout this report.

The matter of deciding what changes shall be considered of enough importance to be presented is left entirely to the discretion of the Commission, all tables which they submit being published without reservation of any kind. This, however, must not be taken to indicate that all important changes are included, as such a presentation would be a practical impossibility, owing to the great number of tariffs to be examined and the short time in which to procure the rates therefrom.

No changes in railroad freight rates were reported by the Interstate Commerce Commission for the month of October, 1910.

No. 5. SERIES 1910—1911

MONTHLY SUMMARY
OF
COMMERCE AND FINANCE
OF THE
UNITED STATES

NOVEMBER, 1910

WASHINGTON
GOVERNMENT PRINTING OFFICE
1910

EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distingusihed from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "*entry for consumption*" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

Kinds, quantities, and values, how ascertained.—The kinds and quantities of all imported merchandise, free from duty, are ascertained by entry, made upon oath or affirmation by the owner, or by the consignee or agent of the importer, or by actual examination where the collector shall think such examination necessary; and the values of all such merchandise are ascertained in the same manner in which the values of imports subject to duties ad valorem are ascertained.

The values of all imported articles subject to specific duties shall be ascertained in the manner in which the values of imports subject to duties ad valorem are ascertained.

The value of merchandise imported since August 5, 1909, subject to ad valorem rates of duty and duty imposed upon and regulated in any manner by the value thereof, shall be "the actual market value or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported; that such actual market value shall be held to be the price at which such merchandise is freely offered for sale to all purchasers in said markets, in the usual wholesale quantities, and the price which the manufacturer or owner would have received, and was willing to receive, for such merchandise when sold in the ordinary course of trade in the usual wholesale quantities, including the value of all cartons, cases, crates, boxes, sacks, casks, barrels, hogsheads, bottles, jars, demijohns, carboys, and other containers or coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States. (Rev. Stats. 336, secs. 18 and 11 of the act of June 10, 1890, as amended by act of August 5, 1909, sec. 28, and Customs Regs., 1908, art. 1604.)

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products of manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports*. The official values of the articles therein represented are the same as the *import values*.

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the Bureau the measures of quantity are as follows, unless indicated otherwise: Ton, 2,240 pounds; hundredweight, 112 pounds. Number of pounds to the barrel—Wheat flour, rye flour, and cornmeal, 196 pounds net weight; rosin, tar, and turpentine, 280 pounds net; fish, pickled, 200 pounds net; cement, 380 pounds net (counting 4 bags to the barrel). Number of pounds to the bushel is as follows: Wheat, beans, and potatoes, 60 pounds; barley and buckwheat, 48 pounds; corn, rye, and flaxseed, 56 pounds; onions, 57 pounds; oats, 32 pounds; malt, 34 pounds; Brazil nuts, 62 pounds.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

TONNAGE MOVEMENT IN THE TRADE OF THE UNITED STATES WITH ITS NONCONTIGUOUS TERRITORIES.

COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

INTERNAL COMMERCE OF THE UNITED STATES.

MORRIS JACOBSON, *Internal Commerce Expert.*

NOVEMBER SUMMARY OF INTERNAL TRADE MOVEMENTS.

The summary of Internal Commerce for November, 1910, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for November and the eleven months of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; and VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, and petroleum, and pig-iron production; IX. Ocean freight rates; and X. Changes in rail freight rates.

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations and demurrage bureaus. Twenty-three different associations and demurrage bureaus report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for November and eleven months of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise; and by trunk-line shipments of flour, grain, and provisions from Chicago. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENTS.

This movement includes receipts and shipments for November and eleven months at important interior markets for three successive years. For receipts of live stock at other markets whose operations are reported in this issue reference should be made to the general trade movement of these sections.

Commercial Movements of Live Stock at Interior Markets during November and Eleven Months ending November, 1908–1910.

GRAIN MOVEMENTS AT INTERIOR MARKETS.

This movement includes receipts and shipments of grain, flaxseed, and flour, as reported to the bureau by the commercial organizations of the respective cities. It should be noted that the methods used in recording the movement vary in the different cities. Thus, receipts at Chicago and St. Louis include through business. Part of the through business may be actually handled at these points. (In such cases the proportion of the through rate is paid and the balance used on what is known as "tonnage for shipments" on other cars of grain.) In some markets receipts include all grain billed direct to the respective market, whether reconsigned after receipt or not. This is true of receipts at Milwaukee, Cleveland, Cincinnati, and Omaha. In other markets the local produce or grain exchanges report as receipts all grain inspected inward by their inspectors, including small quantities not unloaded and forwarded. This is the case in Detroit, Toledo, and Kansas City. Other markets, such as Duluth, Minneapolis, Little Rock, and Louisville, make a strict distinction between purely local business, i. e., quantities actually unloaded at local elevators or warehouses, and mere car arrivals or quantities billed to local consignees. Equally varying are the practices of the different organizations in classing and reporting shipments, which in the case of Chicago and St. Louis include through shipments; in some cities all quantities forwarded or rebilled, even if not unloaded; and in other cities shipments out of local elevators and warehouses or from local wharves or piers. This lack of uniformity naturally results in a considerable degree of duplication and even reduplication, and this fact is to be borne in mind when comparisons between various markets are made.

GRAIN MOVEMENTS FOR CROP PERIODS.

In the following table an attempt is made to present grain movements at interior primary markets in such a manner as to permit of an intelligent study of the effect of each year's production upon such movements. While it is recognized that the selection of the same date as the beginning of the crop year for the various grains must be more or less arbitrary, owing to the appreciable difference in time and place of the maturing and harvesting of the different cereals, it is nevertheless believed that a given period may be used which, although both over and under lapping in certain instances, is comprehensive enough to answer all practical purposes, especially where figures representing movements for cumulative periods of two or more months are employed. To make possible, therefore, the presentation of such information in a single table, September 1 has been decided upon as the fairest arbitrary date marking the beginning of the common crop year.

II.—DOMESTIC COMMERCE OF THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between the domestic ports during the month of November and eleven months ending with November. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During the month of November transactions at 128 ports of receipt and 181 ports of shipment were reported. The number of vessels arriving in November was 6,282 and the departures numbered 6,089 vessels. The registered tonnage for the month was as follows: Arrivals, 9,553,933 net tons; departures, 9,102,237 net tons. This total does not include the tonnage of vessels engaged in trade between the United States and Canada.

SUMMARY OF DOMESTIC LAKE TRAFFIC, NOVEMBER AND ELEVEN MONTHS ENDING NOVEMBER, 1908-1910.

A summary of the lake traffic for November, compared with the corresponding months in 1908 and 1909, is given in the following table. The various quantities and units of freight are reduced to their equivalents in short tons. November receipts in 1910 at all ports reporting were 7,677,726 short tons, compared with 9,897,648 short tons in November, 1909, and 8,369,675 short tons in November, 1908. The figures of shipments of coal include coal loaded for vessels' fuel consumption.

[1] Does not include coal supplied to vessels for their own fueling purposes. For particulars regarding quantities of bunker coal supplied to vessels in the domestic trade at lake ports, see page 819.

In the above table Detroit commerce was treated as part of Lake Erie commerce; the Lake Huron figures include all the commerce north of Detroit and south of Sault Ste. Marie.

Merchandise transported between United States points, but passing, under bond, through Canadian territory, is known as "in-transit" movement. That class of tonnage which required the use of the Great Lakes as a link in its journey in November, 1910, consisted of the following: Receipts at Chicago-South Chicago, 8,091 short tons unclassed freight; Conneaut, 21 short tons flour and 1 short ton unclassed freight; and Milwaukee, 2,371 short tons unclassed freight. Shipments from Ashtabula, 370 bushels corn, 100 bushels oats, and 181 short tons unclassed freight; Chicago-South Chicago, 138 short tons flour, 20,000 bushels wheat, 1,025,625 bushels corn, 48,290 bushels oats, and 619 short tons unclassed freight; Conneaut, 380 short tons iron manufactures and 413 short tons soft coal; and Superior-West Superior, 144,649 bushels wheat.

The total "in-transit" movement for November, 1910, was 380 short tons iron manufactures, 413 short tons soft coal, 159 short tons flour, 164,649 bushels wheat, 1,025,995 bushels corn, 48,390 bushels oats, and 11,263 short tons unclassed freight.

GRAIN RECEIPTS AT SIX DOMESTIC SEAPORTS.

Below is given a comparative table of receipts of grain, including flour reduced to bushels, at six seaboard markets, during November and eleven months ending November, 1908, 1909, and 1910. The figures are derived in every case from the reports of the commercial organizations closely identified with the grain trade at the respective localities. These totals serve to show the relative share of each port in this branch of domestic commerce.

IV. COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section usually includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coal shipments by water from New York, Philadelphia, Baltimore, Norfolk, and Newport News to seaboard points north and south; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from sources of origin, and coastwise and foreign shipping movements at Boston, New York, Philadelphia, and Mobile. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented. Coastwise shipments of petroleum from Texas producing territory to Atlantic and Gulf ports are given in Section VIII. Representative freight rates quoted to leading destinations on the eastern and southern coasts are shown in Section IX.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, AND NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the Middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk, and Atlantic, Gulf, and Pacific coast ports the following figures of the coastwise coal movement have been obtained. These statistics cover probably more than 90 per cent of the shipments for the places and periods mentioned, and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia, shipments are primarily bituminous and secondarily anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio Rivers and east of the Mississippi River and that portion west of the Mississippi included in the States of Louisiana, Oklahoma, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities.

Cotton reports include the statements of the quantity of the crop ginned, brought into sight, and its disposition during successive crop years to the end of August. Other articles of traffic reported are the grain and rice movements at New Orleans, shipments of yellow pine from the Southwest and from Virginia and the Carolinas to destinations, and river and rail traffic at Louisville, Ky., and Little Rock, Ark. Southern river trade is given in Section VII, southern coastwise shipments under Section IV.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac Rivers for shipment direct to northern and eastern mills; and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

Sight Receipts, Port Receipts, Overland Movement, and Distribution of Cotton, September 1 to November 30, 1908–1910.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; redwood-lumber shipments from upper California; arrivals of redwood, pine, and fir at California coast points; lumber shipments from the Pacific Northwest States and from principal northern Pacific ports; commerce at the ports of Portland, Seattle, and Tacoma; and the shipments of citrus fruit from southern California.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburg, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island Dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi Rivers; the traffic movements on the Delaware and Chesapeake Canal, connecting the Chesapeake and Delaware Bays, and similar movements on various navigable streams about whose navigation acceptable information is periodically available.

Unless otherwise specified the data out of which the following tables are constructed are derived from monthly reports received from the engineers in charge of river and harbor improvements under the auspices of the War Department:

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing down stream through Lock No. 3, plus 29,967 short tons mined in the first and second pools, makes a total coal traffic of 683,247 short tons. This total, plus 3,306 short tons of miscellaneous merchandise which passed through Lock No. 3 during the month, represents approximately the general aggregate of downstream traffic during November, 1910—686,553 short tons.

The total freight moved in both directions, on this basis of calculation, was 814,587 short tons in November, 1910, as against 978,137 short tons in November, 1909, and 751,933 short tons in November, 1908.

For eleven months ending with November the total movement was 10,048,389 short tons in 1910, 10,515,745 short tons in 1909, and 8,837,893 short tons in 1908. Of upstream freight, that passing through Lock No. 1 represents approximately the general movement in this direction. The upstream freight passing this point for eleven months ending November amounted to 1,250,135 short tons.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and departures are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For the eleven months ending with November, 1910, of the vessels reported, 1,142 were loaded with coal; 366 carried lumber, logs, piling, and wood; 197 carried ties; 192 carried merchandise; 15, brick; 35, oil; 14, steel; 10, wheat; 2, corn; 69, rock; and 2, molasses.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, and petroleum; also figures of pig-iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke shipments east of Pittsburg and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore & Ohio Railroad, the Chesapeake and Ohio Railway, the Norfolk & Western Railroad, and other eastern roads; weekly Connellsville coke output and shipments; St. Louis receipts of coal. Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima-Indiana, and Mid-Continent fields. Statistics of pig-iron production cover the principal producing districts, and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MID-CONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Mid-Continent field includes Kansas and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude from southeastern Ohio and Lima-Indiana crude from northwestern Ohio; the Indiana Pipe Line Company, which receives crude from Indiana and Illinois; and the Prairie Oil and Gas Company, which operates in the Mid-Continent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude, and its Lima-Indiana crude was reported jointly with that of the Indiana pipe line. Also, prior to this date, the pipe line distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and for which they are liable. In addition, the pipe lines hold a certain amount of sediment and surplus oil, which, combined with net stocks, constitute gross stocks.

IX.—OCEAN FREIGHT RATES.

The monthly range in ocean freight rates on staple products, for comparative periods of two years, between important Atlantic and Gulf ports and Europe, is shown in tables for Boston, New York, Baltimore, and New Orleans. In the Baltimore table, unless otherwise specified, rates in United States currency are in cents per 100 pounds, and those in English sterling per long ton of 2,240 pounds.

Range of Ocean Freight Rates from New York, N. Y., to European Ports during November, 1909 and 1910.

X.—CHANGES IN RAILROAD FREIGHT RATES.

Changes in railroad freight rates are obtained through the courtesy of the Interstate Commerce Commission, the auditor of that body transmitting them on the latest date which will permit of their insertion in the Summary. In this manner their publication is assured as soon after their receipt as possible, and as a rule they cover a period nearly a month later than that represented by other statements throughout this report.

The matter of deciding what changes shall be considered of enough importance to be presented is left entirely to the discretion of the Commission, all tables which they submit being published without reservation of any kind. This, however, must not be taken to indicate that all important changes are included, as such a presentation would be a practical impossibility, owing to the great number of tariffs to be examined and the short time in which to procure the rates therefrom.

No changes in railroad freight rates were reported by the Interstate Commerce Commission for the month of November, 1910.

MONTHLY SUMMARY
OF
COMMERCE AND FINANCE
OF THE
UNITED STATES

DECEMBER, 1910

WASHINGTON
GOVERNMENT PRINTING OFFICE
1911

EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "*entry for consumption*" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

Kinds, quantities, and values, how ascertained.—The kinds and quantities of all imported merchandise, free from duty, are ascertained by entry, made upon oath or affirmation by the owner, or by the consignee or agent of the importer, or by actual examination where the collector shall think such examination necessary; and the values of all such merchandise are ascertained in the same manner in which the values of imports subject to duties ad valorem are ascertained.

The values of all imported articles subject to specific duties shall be ascertained in the manner in which the values of imports subject to duties ad valorem are ascertained.

The value of merchandise imported since August 5, 1909, subject to ad valorem rates of duty and duty imposed upon and regulated in any manner by the value thereof, shall be "the actual market value or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported; that such actual market value shall be held to be the price at which such merchandise is freely offered for sale to all purchasers in said markets, in the usual wholesale quantities, and the price which the manufacturer or owner would have received, and was willing to receive, for such merchandise when sold in the ordinary course of trade in the usual wholesale quantities, including the value of all cartons, cases, crates, boxes, sacks, casks, barrels, hogsheads, bottles, jars, demijohns, carboys, and other containers or coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States. (Rev. Stats. 336, secs. 18 and 11 of the act of June 10, 1890, as amended by act of August 5, 1909, sec. 28, and Customs Regs., 1908, art. 1604.)

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products of manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports*. The official values of the articles therein represented are the same as the *import values*.

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the Bureau the measures of quantity are as follows, unless indicated otherwise: Ton, 2,240 pounds; hundredweight, 112 pounds. Number of pounds to the barrel—Wheat flour, rye flour, and cornmeal, 196 pounds net weight; rosin, tar, and turpentine, 280 pounds net; fish, pickled, 200 pounds net; cement, 380 pounds net (counting 4 bags to the barrel). Number of pounds to the bushel is as follows: Wheat, beans, and potatoes, 60 pounds; barley and buckwheat, 48 pounds; corn, rye, and flaxseed, 56 pounds; onions, 57 pounds; oats, 32 pounds; malt, 34 pounds; Brazil nuts, 62 pounds.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

The reports of this Bureau are supplied to applicants without expense so long as the editions allowed for distribution will permit, upon application to "Chief of the Bureau of Statistics, Department of Commerce and Labor, Washington, D. C.," and can be purchased at a small price by application to the "Superintendent of Documents, Office of Public Printer, Washington, D. C."

As the demand on the part of the public for the reports of the Bureau is beyond its ability to supply, persons to whom they are regularly sent having no further use for them are requested to notify this Bureau of their willingness to dispense with them. The Bureau will be glad to receive such copies of its publications as have been sent to parties who do not care to retain them, and upon receipt of notice of willingness to return such copies franked mailing slips will be forwarded for that purpose; but one frank is required for each package, which may contain several copies, if the package does not exceed 4 pounds in weight. *Notify the Bureau promptly of change of address.*

- COMMERCE OF GUAM AND TUTUILA.
- RECAPITULATION OF COMMERCE OF NONCONTIGUOUS TERRITORIES.
- TONNAGE MOVEMENT IN THE TRADE OF THE UNITED STATES WITH ITS NONCONTIGUOUS TERRITORIES.

COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

SUMMARY OF INTERNAL TRADE MOVEMENTS FOR DECEMBER AND THE CALENDAR YEAR 1910.

The summary of Internal Commerce for December, 1910, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for the twelve months of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I, Commercial movements at interior centers; II, Coastwise commerce on the Great Lakes; III, Commercial movements at the North Atlantic seaboard; IV, Coastwise commerce at Atlantic and Gulf ports; V, Commercial movements in southern territory; and VI, Commercial movements on the Pacific coast. Other tables, representing no particular geographical sections, are: VII, Commercial movements on rivers and canals; VIII, Commercial movements of coal, coke, petroleum, and pig-iron production; IX, Lake freight rates; X, Ocean freight rates; and XI, Building operations.

LIVE-STOCK AND GRAIN MOVEMENTS DURING 1910.

Commercial movements of live stock during the past year, as measured by the receipts of live stock at seven primary interior markets, are characterized by a shortage in the commercial supply of hogs; the total annual receipts of these animals, 15,685,435 head, being the lowest for any year since 1896, and falling 20 per cent short of the average for the preceding five-year period. The receipts of cattle at these markets, 9,265,412 head, were slightly larger than during 1909, though below the average for the preceding five-year period; those of calves, 983,432 head, by far exceeded the figures for any year reported to the bureau. The receipts of sheep, 12,406,767 head, likewise show a record total, being about 20 per cent in excess of the average for the preceding five years. Receipts of horses and mules, 368,252 in number, while larger than for the preceding two years, show a diminution as compared with figures for the earlier years.

The calculated number of loaded live-stock cars received at the seven markets during the past year was 690,423, compared with 708,210 cars in 1909 and 740,257 cars in 1908. It should also be borne in mind that cattle figures for Omaha and St. Louis include the receipts of calves. The loss in numbers of hogs reported for the past year is offset to some extent by the greater average weight of the animals brought to market. On the other hand the average weight of cattle marketed during the past year appears to have been smaller than for the earlier years. The loss in the receipts of hogs affects nearly all the leading markets except St. Paul, which shows a gain over the 1909 figures, though even in the case of that market the 1910 receipts were over 50,000 head short of the average for the preceding five-year period. As compared with the five-year average for 1905–1909, Chicago shows a loss of 8 per cent, Kansas City a loss of 9 per cent, Omaha a gain of 11 per cent, St. Louis a loss of 2 per cent, St. Joseph a loss of 25 per cent, and Sioux City a loss of 4 per cent.

The total receipts of cattle during the past year were slightly in excess of those reported in 1909, though Kansas City, St. Louis, and St. Joseph show smaller totals than for the preceding year. A large gain is indicated in the annual receipts of sheep, the total for the year being almost double the corresponding total in 1897. The heavy marketing of sheep appears to have started during the late summer months of the past year, the receipts of sheep for the first six months of the year being 11 per cent below the average for the corresponding five-year period. Judging by the December figures, the sudden increase in the marketing of sheep seems to have abated, the figures for the last month of the year falling below the corresponding figures of the two preceding years.

Receipts of meat animals during the past year at the four leading Atlantic seaport cities are stated as 8,240,317 head, compared with 9,220,901 and 9,865,980 head reported for 1909 and 1908. Of the total received, 1,075,985 head were cattle, 623,119 head calves, 3,293,406 head hogs, and 3,247,807 head sheep. Decreases, as compared with 1909 figures, are shown for all animals, particularly hogs, the arrivals of which show a decline since last year of about 18 per cent.

Shipments of packing-house products from Chicago during the past year totaled 1,998,246,875 pounds, indicating a decrease of about 20 per cent, as compared with the average for the preceding five-year period. The decrease affects almost equally the shipments of fresh beef, cured meats, and pickled beef. The shipments of canned meats while larger than for the preceding two years have not yet regained the ground lost since 1906. The most notable decrease is shown in the shipments of lard, the figures for the past year, 268,702,900 pounds, being one-third less than the shipments as late as 1906.

The eastbound trunk-line movement of provisions during the year by way of Chicago and Chicago Junction points, 887,697 short tons, shows an equally if not more unfavorable turn when compared with the average volume of this movement for the preceding years. The shrinkage in the volume of this movement is due to a considerable extent to the decrease in the exports of meats and meat products, which is one of the characteristic features of last year's development of our foreign trade. The stocks of meat at the end of the year at five of the leading packing centers, 135,622,969 pounds, show but little change from the total reported at the end of the previous year, though falling almost 50 per cent short of like stocks at the end of 1908.

The grain receipts during the calendar year at 15 leading primary markets totaled 814,167,454 bushels, a total in excess of those reported for the last two years. The aggregate was made up of 264,588,917 bushels of wheat; 243,098,001 bushels of corn; 218,141,254 bushels of oats; 80,916,056 bushels of barley; and 7,423,226 bushels of rye. As compared with the preceding year's figures, all classes of grains show gains except rye. The largest wheat receipts for the year are credited to Minneapolis, which reports a 23 per cent gain in receipts over the 1909 total. Duluth appears to have lost considerable ground, the wheat receipts for the past year being over 20,000,000 bushels short of the 1909 receipts; as a result, Kansas City stands second in rank among the primary wheat markets, Chicago, St. Louis, and Milwaukee being the other markets reporting receipts of wheat for the year in excess of 10,000,000 bushels. The importance of Chicago as the leading market for corn and oats has not been affected by last year's movements, about 42 per cent of the corn receipts and about 47 per cent of the receipts of oats being credited to that city. The distribution of barley receipts is more even, Chicago, Minneapolis, Milwaukee, and Duluth each partaking of extensive shares of the product marketed. The decline in the market receipts of flaxseed noted for 1909 has been even more pronounced during the past year. Of the total of 14,041,547 bushels over one half was handled at Minneapolis, the other two important markets being Duluth and Chicago.

Flour shipments at 12 leading milling centers, 41,938,888 barrels, fell below those reported the year before. Minneapolis reports a normal increase in its flour shipments, the losses affecting mainly Chicago and Milwaukee. Peoria's shipments of flour show a steady increase since 1907. The combined flour and grain receipts for the year at the four leading Atlantic seaports aggregated 172,405,567 bushels, of which 37,712,735 bushels was wheat, 28,651,661 bushels corn, and 14,753,744 barrels flour, the large decrease in the wheat receipts corresponding to the smaller export demand for the article at the ports in question.

LEADING LUMBER MOVEMENTS DURING 1910.

The more important lumber movements during the year, as reported to the bureau by leading lumber associations, indicate a more or less stationary condition of trade, caused in part by a similar condition of the building trades, especially in the larger cities of the East. The rail shipments reported by the Northern Pine Manufacturers' Association from the territory in the Mississippi and Wisconsin valleys, 1,186,040,000 feet, differ but slightly from the total quantity reported during the preceding two years, although the number of reporting concerns was larger. Since 1906, a decrease in the rail shipments of about 35 per cent may be noted. Shipments of lumber by lake, while larger than the year before, show the same general downward tendency. Shipments during the year of yellow pine from Southern and Southwestern States, as reported by the Yellow Pine Clearing House, aggregated 4,950,482,000 feet, compared with 4,933,828,000 feet for 1909. It is to be noted, however, that the number of concerns reporting to the clearing house was considerably smaller in 1910 than for the year before. Practically all this lumber is transported by rail, the greater part being consumed locally or in the neighboring States. No further growth is shown in the quantities taken by the States of the Middle West, such as Ohio, Indiana, and Illinois, which showed a large increase for 1909. The North Carolina Pine Association reports the 1910 shipments from its territory, Virginia and the Carolinas, as 260,892,000 feet, compared with 293,320,000 feet in 1909. The greater part of the shipments, as in earlier years, was consigned to New York, Pennsylvania, New Jersey, and the New England States. The movement of pine lumber from the Pacific Northwest, including the States of Idaho, Montana, Oregon, and Washington, as reported by the Western Pine Manufacturers' Association, totaled 849,042,411 feet, compared with 809,563,011 feet shipped during 1909. More than 45 per cent of the total represents local shipments. Of the surplus shipped outside the local territory, the largest consumers for the year appear to have been the following States: the Dakotas, Nebraska, Wisconsin, Iowa, and Colorado.

The movement of redwood lumber during the past year, as measured by the quantities consigned to San Francisco and Southern California points, aggregated 382,536,000 feet, compared with 350,908,000 feet in 1909 and 389,784,000 feet in 1907, the largest yearly total recorded by the San Francisco Lumber Record Bureau. The annual pine and fir arrivals at the same points, 1,300,464,000 feet, were largely in excess of the figures for the previous two years and approximate closely those for 1907, the year following the San Francisco earthquake.

Coastwise receipts for the year of southern pine at New York, 459,535,000 feet, were below the 1909 receipts of 486,661,000 feet. Lumber receipts at Boston, 325,621,000 feet, of which 42,683,000 feet were from foreign sources, show a substantial gain over the 1909 figures of 307,468,000 feet, this increase corresponding to a considerable gain in the figures of building operations in that city.

LEADING COAL MOVEMENTS DURING 1910—PRODUCTION OF COKE AND PIG IRON.

The annual figures of coal movements in the East both by rail and water show a satisfactory volume. The anthracite coal shipments from eastern producing territory, 64,905,726 long tons, exceeded those for the two previous years. This total was exceeded only once, in 1907, the year following the great anthracite strike, when the total amounted to 67,109,393 long tons. In view of restricted area and increasing cost of production of anthracite coal, the general opinion is that no decided increase of the supply of this class of coal is to be expected in the future. Almost one-fourth of the total shipped, viz, 15,036,622 long tons, was handled in and around New York for shipment to New York proper or to other Atlantic ports. Coastwise shipments of anthracite from Philadelphia during the year totaled 1,980,830 long tons, while the coastwise shipments at Baltimore are reported as 272,695 long tons. The lake movement of anthracite from Lake Erie ports, mainly Buffalo, to Lake Michigan and Lake Superior ports, was also heavier than during 1909, as shown in the discussion of lake commerce figures.

The bituminous movement in the East, as reported by nine leading coal-carrying roads, totaled 121,460,415 short tons, or 15 per cent in excess of the 1909 total. This movement closely approximates the record movement for 1907. There is little doubt, however, that the gains reported by the eastern carriers were due in part to the greater demand for eastern coal in the territory normally tributary to the Illinois coal field; for it is plain that the heavier shipments of lake coal must have been preceded by a correspondingly larger coal movement toward the Lake Erie ports. The 1910 coastwise shipments of soft coal from the five principal Atlantic ports totaled 26,121,224 long tons, compared with 24,111,488 long tons shipped the year before, exceeding in volume even the 1907 shipments of 24,938,793 long tons. Of the total coastwise shipments of coal, 11,289,095 long tons are credited to New York, 4,700,174 long tons to Philadelphia, 3,780,120 long tons to Baltimore, 2,817,701 long tons to Newport News, and 3,534,134 long tons to Norfolk. The largest relative gain as compared with 1909 totals is shown by Norfolk, the gain at this port being due mainly to the larger operations at the Sewells Point Piers of the Virginian Railway.

The river movement of coal during the past year does not show the same favorable development owing to the unsatisfactory stage of the water during part of the year on some of the interior waterways. The 1910 shipments by way of the Monongahela River were 9,460,695 short tons, as compared with 9,736,666 short tons in 1909. The coal movement by way of Davis Island Dam was 1,774,760 short tons, as against 2,466,710 short tons during the preceding year. The coal movement on the Great Kanawha, 1,229,660 short tons, and at Louisville over the canal and falls of the Ohio River, 896,317 short tons—to mention only some of the more important river movements—were smaller in volume than the year before.

The coke movement for the year from the Connellsville district is reported as 18,689,722 short tons, a figure in excess of the totals for the preceding two years, but smaller than the shipments reported for 1906 and 1907. The less favorable result for the year is due to the curtailment of the pig-iron output, which became more pronounced during the late summer of the year and continued increasingly during the fall and winter. The 1910 volume of the coke movement reported by nine leading eastern carriers was 26,790,095 short tons, compared with 25,922,152 short tons the year before, nearly all the leading roads showing substantial increases, as compared with the 1909 tonnage of this commodity.

The output of coke and anthracite pig iron for the year is stated as 26,852,511 long tons, a total in excess of the largest annual figures heretofore reported in the annals of the trade. This large total, however, was due to the gains reported for the first half and chiefly the first quarter of the year. Operations during the second half of the year were on a basis 17 per cent smaller than during the corresponding period in 1909, while the average output during the last three months of the past year fell 25 per cent below the output for the first three months of the same year. Curtailment of operations in the iron industry is ascribed in part to the unsettled state of affairs in the railway field. It appears from figures compiled from the Railway Age Gazette that while the number of freight and passenger cars built during the past year, 180,945 and 4,412, respectively, was in excess of the 1909 totals, the number of cars ordered to be built, 141,204 and 3,881, was smaller than the year before.

Building operations in the more important cities of the country, as reported to the bureau, likewise proceeded on a somewhat smaller scale, the losses in New York, Philadelphia, St. Louis, and San Francisco outweighing the considerable gains shown for other important cities of the country. (For table of monthly building operations in the larger cities of the country, see pp. 612 to 614.)

COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY DURING 1910.

In the cotton trade the commercial year does not coincide with the calendar year, but ends August 31. Inasmuch, however, as over 95 per cent of the year's crop has passed through the ginneries by the end of the calendar year, a fairly accurate idea may be formed of the year's available supply. The ginning reports of the Census Bureau indicate a total of 11,254,115 bales of the 1910 crop ginned to January 16 of the present year, compared with 9,787,592 and 12,666,303 bales ginned to January 16, 1910, and 1909. Notwithstanding the ravages of the boll weevil, the share supplied by the southwestern section, including Texas and Oklahoma, shows but little diminution, this share being in the neighborhood of 34 per cent for the present season as well as for the preceding five-year period. The total sight receipts for the four months of the commercial year are stated by the New Orleans Cotton Exchange as 8,261,338 bales for the present season, compared with 7,120,928 bales for the 1909–10 season and 8,710,839 bales for the 1908–9 season. The port receipts show a similar development, the respective figures being 6,071,429 bales for the four months of the present season, as compared with 5,074,548 bales for the 1909–10 season, and 6,330,383 bales for the four months of the 1908–9 season. About 68 per cent of the four months' receipts is credited to the three ports of Galveston, Savannah, and New Orleans, as against 70.8 per cent for the four months ending December, 1909, and 73.4 per cent for the period ending December, 1908. The takings of the American spinners for the four months of the present season are given as 2,159,414 bales, compared with 2,114,457 bales for the corresponding period of the preceding season and 2,401,626 bales for the same period of the 1908–9 season. As compared with 1909–10 figures, the takings of northern mills show a slight increase, while those of the southern mills a slight decrease. American stocks at the end of the year are given as 1,988,596 bales, compared with 1,552,310 bales on the last day of December in 1909 and 1,948,547 bales on the same date in 1908.

Receipts of rough rice at New Orleans, the principal market for this commodity, for the five months of the present season, 896,330 sacks, fell short of the corresponding 1909 and 1908 figures of 1,018,984 and 926,198 sacks. Shipments of clean rice, 1,291,718 pockets, while below the corresponding quantities in 1909 of 1,346,781 pockets, were, however, almost 50 per cent larger than in 1908.

Receipts of spirits of turpentine at Savannah for the nine months of the current season, beginning April 1, 157,047 barrels, show a further decline from the low figures reported for the previous year, and the same is true of the receipts of rosin, 518,900 barrels. The domestic shipments of spirits of turpentine for the nine months of the present season, 76,853 barrels, for the first time in a number of years exceeded the exports. The domestic shipments of rosin, 289,759 barrels, were in excess of the shipments reported for corresponding periods of the two preceding years, while the foreign shipments of this article fell considerably below similar figures in 1908 and 1909. Notwithstanding the diminution in the foreign demand, the stocks of spirits of turpentine at the end of the year were but 16,199 barrels, compared with 36,788 barrels at the end of 1909 and 47,756 barrels at the end of 1908. The stocks of rosin, 84,076 barrels, also show a considerable decrease as compared with the 1909 and 1908 figures.

LAKE COMMERCE DURING 1910.

The volume of lake commerce, as measured by the quantity of merchandise shipped between domestic lake ports, attained during the past year a record total of 86,732,316 short tons, compared with 80,974,605 short tons shipped during 1909, and 83,506,991 short tons shipped in 1907, the largest previous annual total recorded by the bureau. This gain was due in part probably to temporary conditions, viz, the heavier coal shipments to upper lake ports, caused by the partial cessation of work in the Illinois coal field and the resulting shortage of supply in the territory normally tributary to that field.

Domestic shipments of iron ore for the year were also heavier than for any year past, notwithstanding the fact that ore shipments from the upper lake ports practically ceased at the end of November. The grain and flaxseed shipments show a considerable decline for the year when compared with previous totals. The lumber movement, while heavier in volume than during the preceding two years, did not attain the proportions of the earlier years. Shipments of miscellaneous freight, while slightly below those for the preceding year, exceeded in volume like shipments for the earlier five years. It is to be borne in mind, however, that the movements discussed do not cover the entire shipping of the Great Lakes; the figures above given are exclusive of the volume of foreign trade with Canada; neither do they include the volume of Canadian trade proper, viz, domestic movements between Canadian ports, nor, as a rule, the purely local movements within the limits of ports proper. Of the total domestic lake shipments, 41,517,641 long tons, or 54 per cent, were made up of iron ore, compared with 40,732,677 long tons moved during the 1909, and 40,727,972 long tons moved during the 1907 seasons. The percentage of iron-ore shipments in the total shipments shows no appreciable change, the ratio for the preceding five-year period being the same as for the past year. Of the total shipments, 36,696,296 long tons are credited to Lake Superior ports and 4,821,345 long tons to Lake Michigan ports. The leading ports of shipment in the order of their importance were Duluth, with 13,548,569 long tons; Superior, with 8,245,225 long tons; Two Harbors, with 7,958,060 long tons; Escanaba, with 4,799,558 long tons; Ashland, with 3,867,011 long tons; and Marquette and Presque Isle, with 3,077,431 long tons. Of the total dock deliveries, 82 per cent is credited to Lake Erie ports for transportation further inland, mainly to Ohio and Pennsylvania furnaces, and 18 per cent to Lake Michigan ports for consumption at the furnaces situated at the lake front. The leading ore-receiving ports in the order of their importance were Ashtabula, credited with 9,626,897 long tons; Cleveland, 6,356,762 long tons; Conneaut, 6,318,135 long tons; Chicago-South Chicago, 5,120,165 long tons; Buffalo and the Tonawandas, 4,735,151 long tons; and Lorain, 2,830,481 long tons. All these ports, with the exception of Buffalo and Conneaut, show larger figures than the year before. The quantities unloaded at the south shore of Lake Michigan in the Chicago district, including the docks at Indiana Harbor and Gary, totaled 2,044,791 long tons, compared with 2,181,496 long tons during the preceding year.

The lake shipments of soft coal during the year totaled 18,406,469 short tons, indicating a gain of 35 per cent over the corresponding figures of the preceding year. These shipments proceeded mainly from Lake Erie ports: Ashtabula, Toledo, Cleveland, Lorain, and Sandusky accounting for over 82 per cent of these shipments. Over 60 per cent of the soft coal received at all lake ports was unloaded at Duluth, Superior, and Milwaukee, deliveries at these three cities exceeding those of the preceding year by almost 45 per cent. Like receipts at Chicago, 605,456 short tons, were about 20 per cent larger than in 1909. The smaller Lake Michigan ports, such as Green Bay, Manitowoc, and Sheboygan, also show considerable gains in the 1910 receipts of soft coal.

The total shipments above given are exclusive of the quantities of fuel or bunker coal supplied to vessels in the domestic trade, this total being 2,103,659 short tons. Moreover, 281,950 short tons were supplied to American and Canadian vessels in the foreign trade, while the aggregate of fuel coal supplied to all kinds of vessels, including tugs, ferries, and other boats in the harbor trade, according to special inquiry of the Bureau of Statistics, was 2,961,452 short tons. The corresponding 1909 figures were as follows: Bunker coal supplied to vessels in the domestic trade was 2,021,393 short tons; bunker coal supplied to vessels in the foreign trade was 261,408 short tons; while the total amount of fuel coal supplied to all classes of vessels in 1909, as reported by the fueling concerns, was 3,148,475 short tons.

The hard-coal movement for the year, 4,170,813 short tons, mainly from Buffalo, Erie, and Oswego, was about 15 per cent heavier in volume than in 1909. Almost 79 per cent of this coal was unloaded at Duluth, Superior, Chicago, and Milwaukee; Chicago alone taking more than 1,000,000 tons during the year and Milwaukee a quantity slightly less. The total lake receipts of hard coal during the past year are in excess of like receipts for any year during the last 10 years, except 1908.

The lumber shipments by lake for the past year, 1,207,792,000 feet, compare favorably with the 1909 total of 1,155,765,000 feet, though the falling tendency of this movement when compared with the figures for earlier years is unmistakable. Of the total shipments, 51 per cent proceeded from Lake Michigan ports and 41 per cent from Lake Superior ports. The largest shipping ports in the order of their importance were Duluth, Manitowoc, Manistique, and Manistee; the other ports showing shipments of less than 50,000,000 feet for the year under consideration. The total lumber receipts during the past year are about evenly divided between Lake Erie and Lake Michigan ports. It is noteworthy, though, that while lake receipts of lumber at Chicago during the past year show a considerable decline, when compared with the figures of the preceding three years, the annual receipts at the Tonawandas show a substantial gain.

The grain and flaxseed shipments by lake during the past year, 117,275,310 bushels, fell below the total of 128,087,192 bushels reported for the preceding year, and were also below the average for the preceding five-year period. The lake shipments of wheat show the largest decline, this decline corresponding fairly well with the reduction in quantity exported from the Atlantic seaports. The corn shipments for the year, on the other hand, were largely in excess of last year's shipments, the increase probably being due in part to the larger export demand. The shipments of oats likewise show a heavy increase over last year's figures, while those of barley were slightly lower than the year before. Of the 37,179,364 bushels of wheat shipped during the year, about two-thirds proceeded from Duluth-Superior, about 23 per cent from Chicago, and practically the rest from Milwaukee. About 87 per cent of the domestic lake receipts of this article is credited to Buffalo, none of the other larger receiving ports, such as Chicago, Cleveland, and Detroit, showing quantities in excess of 1,500,000 bushels. The corn shipments for the year, 39,521,929 bushels, were largely in excess of the figures for the earlier years. Over 90 per cent of the shipments proceeded from Chicago, Milwaukee being the only other shipping port credited with over 2,500,000 bushels. Not all the shipments found their way direct to American lake ports; of the total, 7,214,009 bushels, practically all from Chicago, was shipped to Canadian landings, mainly to Georgian Bay ports, to be forwarded thence in bond to American shipping and distributing points. Of the total corn receipts by lake, over 70 per cent is credited to Buffalo, the other larger receiving ports in the order of their importance being Ogdensburg, Port Huron, and Ludington.

The lake shipments of oats during the year, 22,659,792 bushels, were likewise heavier than during the preceding year, and proceeded mainly from Chicago, Milwaukee, Manitowoc, Duluth-Superior, and Gladstone. Of the total shipments, 1,990,045 bushels were shipped to American inland destinations or Atlantic ports via Canadian lake ports, and therefore do not figure among the lake receipts of this commodity. Of the total receipts 37 per cent was unloaded at Lake Michigan ports, principally Ludington and Frankfort, and 55 per cent at Lake Erie ports. The barley movement during the year, 13,837,037 bushels, proceeded mainly from Lake Superior and Lake Michigan ports, the principal shipping points being Duluth-Superior and Milwaukee. About 84 per cent of the receipts of this article is credited to Buffalo, the smaller receiving ports being Ludington, Grand Haven, and Frankfort. The lake shipments of rye fell below 1,000,000 bushels during the past year, and were taken mainly by Ludington, Buffalo, and Frankfort.

A further decline in the lake shipments of flaxseed, first observed in the 1909 report, is another notable feature of the 1910 lake commerce, the total shipments, 3,106,792 bushels, being less than one third of the shipments in 1909 and less than 20 per cent of the shipments during the earlier years. The flour shipments during the year, 1,171,327 short tons of 10 barrels each, were well sustained as compared with the records of the preceding years, the main shipping ports, Duluth-Superior, Milwaukee, and Chicago, showing but little change in their relative position, though the flour shipments from Milwaukee were lower than during the preceding year. Shipments were consigned mainly to Buffalo, Erie, and Fairport, on Lake Erie, smaller quantities being unloaded at the Lake Michigan ports of Ludington and Grand Haven. No appreciable changes in the volume of movement are reported for the year in the case of pig iron, salt, and copper. The shipments of miscellaneous, including package, freight, 7,470,005 short tons, show a slight decrease as compared with the 1909 figures.

The largest freight receipts at any of the lake ports are shown by Ashtabula, which reports a total inbound merchandise tonnage of 10,783,033 short tons, of which all except 908 tons was iron ore. Other ports credited with freight receipts in excess of 5,000,000 tons in the order of their magnitude are Chicago, with 9,310,874 short tons; Buffalo, 8,435,136 short tons; Cleveland, 8,002,144 short tons; Conneaut, 7,082,246 short tons; Superior, 6,684,457 short tons; and Milwaukee with 6,408,728 short tons. Freight receipts during the year at Duluth-Superior aggregated 9,587,020 short tons, thus placing these two cities, which for shipping purposes may be regarded as one port, second among all lake ports as regards inbound tonnage. The largest outbound tonnage is credited to Duluth, which reports 16,105,551 short tons shipped; Superior with 10,315,004 short tons following next in order. The volume of shipments from these two cities constituted nearly 39 per cent of the total lake shipments during the season. Other lake ports showing freight shipments in excess of 4,000,000 tons, in the order of their magnitude, were Two Harbors, with 9,007,542 short tons to its credit; Escanaba, with 5,407,045 short tons; Buffalo, with 4,896,836 short tons; Ashtabula, with 4,854,444 short tons; and Toledo with 4,337,013 short tons. Inasmuch as the relative tonnage for these ports is influenced chiefly by the figures of receipts and shipments of the less valuable commodities of iron ore and coal, no conclusions should be drawn from the figures just given regarding the relative standing of the ports, so far as the value of their total domestic trade is concerned.

The 1910 vessel movement in the domestic lake trade, as measured by the outbound vessel tonnage, established a new record of 110,292,481 net tons register, compared with 103,271,885 net tons for the preceding year. The total number of departures, 75,941, was also larger than for the past three years, although it fell below the like number reported in 1906 and 1905. The average size of lake vessels engaged in the domestic trade, as calculated from the tonnage figures just given, was 1,452 net tons register, compared with 1,413 net tons for the year 1909 and 1,004 net tons for 1905. The largest outbound vessel tonnage is credited to Duluth, which reports 10,429,102 net tons register. Chicago, Superior, and Milwaukee, with over 8,000,000 net tons each to their credit, show a remarkably close competition for lake vessel tonnage; Buffalo, Ashtabula, and Cleveland being the only other ports with an outbound tonnage in the domestic trade for the year 1910 in excess of 5,000,000 tons.

The freight and vessel movements for the year through the Sault Ste. Marie canals, Michigan, and Ontario, Canada, also show a higher volume than for any previous year. The total freight movement through the locks is given as 62,363,218 short tons, of which the east-bound iron-ore movement constituted 67 per cent and the west-bound coal movement 22 per cent. In explanation of the discrepancies between the figures reported by the canal authorities and those appearing in the lake commerce tables of the Summary, it should be stated that the canal figures for iron ore are exclusive of the south-bound and east-bound iron-ore shipments from Lake Michigan ports, but inclusive of foreign shipments to the lower lakes from American ports on Lake Superior and domestic shipments from Canadian points on that lake to points east of the canals, which do not enter the total shown in this Summary. On the other hand, the considerable quantities of coal which are shipped mainly from Lake Erie ports to Canadian ports at the head of Lake Superior are part of the coal movement reported by the canal authorities, while the lake commerce statement of this office, dealing with domestic movements only, does not include these figures as part of the lake commerce movement.

Similar discrepancies are shown between the canal figures of the eastward wheat movement and the domestic eastward wheat shipments from our own Lake Superior ports, the canal figures including all the wheat moved from American and Canadian ports west of the locks to both domestic and foreign landings.

The number of vessel passages through the locks during the year past is given as 20,899, which is larger than the number reported for any of the preceding three years, though falling below the totals reported for 1905 and 1906. The tonnage of registered vessels which passed through the canals was more than 3,000,000 tons in excess of the 1909 figures and 25 per cent larger than the average registered tonnage reported for the preceding five-year period.

Domestic traffic by way of the Detroit River showed a similar gain over the figures of the preceding years, the total freight tonnage for the river, 67,559,922 short tons, exceeding the 1909 traffic by over 5,000,000 tons. Of the total amount reported for the year, 44,471,813 short tons represent the south-bound and 23,088,109 short tons the north-bound movement. It is noteworthy that while no appreciable gain is shown in the south-bound tonnage, the north-bound tonnage, because of the heavier coal movement, was almost 30 per cent larger in volume than for the preceding season. The total vessel movement through the river for the year included 21,613 vessels, of 48,978,637 net tons register, a vessel tonnage slightly greater than in 1907, when 23,721 vessel passages were reported, representing 48,958,238 net tons register.

RIVER AND CANAL TRAFFIC IN 1910.

The data received by the Bureau of Statistics regarding transportation on the country's rivers and canals are but fragmentary and reflect the development of these movements in a very imperfect manner. This applies particularly to the commerce of Mississippi River points, for which no satisfactory data can be given. The bureau receives returns of vessel movements at Cairo, Ill., at the confluence of the Ohio and Mississippi Rivers. The figures for the past year show a further diminution of traffic at that point, the 1910 data, 5,875 vessels of 3,202,910 net tons, indicating a decrease of 22 per cent in the number of vessels and of 27 per cent in the vessel tonnage recorded at that point, as compared with the average figures for the preceding five-year period.

The year's freight tonnage received and shipped by river at St. Louis, 191,965 short tons, was the lowest on record, owing mainly to the smaller receipts of coal by way of the Ohio River.

Downstream traffic at Lock No. 3 on the Monongahela River, representing the maximum downstream movement on the river, of which practically all was soft coal, totaled 9,138,196 short tons, a quantity slightly smaller than the year before and over a million tons below the total for the 1907 season, which marks the largest coal shipments through the lock. The upstream traffic for the year at Lock No. 1 of the river, representing the maximum upstream movement, and composed of sand and gravel mainly, totaled 1,329,919 short tons, and shows a similar decrease. An interesting recent development is the growth of iron and steel products by that river, which for the first time shows an annual total in excess of 100,000 tons at this lock. River traffic in both directions by way of Davis Island Dam totaled 3,138,074 short tons for the year, compared with 3,819,705 short tons in 1909, the decline being due chiefly to the smaller shipments of coal.

The 1910 traffic on the Kanawha River, Lock No. 11, and over the falls and the Louisville and Portland canal of the Ohio River at Louisville, Ky., 1,262,986 short tons and 1,090,229 short tons, respectively, the greater part of which is made up of coal, also shows a decrease as compared with the preceding year's total.

A considerable growth of tonnage for the year is shown for the Big Sandy River, Ky., and the Cumberland River, Tenn., while traffic movements on the Green River, Ky., and the Little Kanawha River show considerable declines since 1909.

The Erie Canal tonnage for the year, 2,023,185 short tons, also shows a slight decrease since the preceding year, and the same is true of the traffic carried on all New York State canals, the 1910 total of 3,073,412 short tons being the lowest for the decade, except for the year 1908.

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations and demurrage bureaus. Twenty-three different associations and demurrage bureaus report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest. to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for December and twelve months of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise; and by trunk-line shipments of flour, grain, and provisions from Chicago. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENTS.

This movement includes receipts and shipments for December and twelve months at important interior markets for three successive years. For receipts of live stock at other markets whose operations are reported in this issue reference should be made to the general trade movement of these sections.

[1] As reported by the Indianapolis Board of Trade.

GRAIN MOVEMENTS AT INTERIOR MARKETS.

This movement includes receipts and shipments of grain, flaxseed, and flour, as reported to the bureau by the commercial organizations of the respective cities. It should be noted that the methods used in recording the movement vary in the different cities. Thus, receipts at Chicago and St. Louis include through business. Part of the through business may be actually handled at these points. (In such cases the proportion of the through rate is paid and the balance used on what is known as "tonnage for shipments" on other cars of grain.) In some markets receipts include all grain billed direct to the respective market, whether reconsigned after receipt or not. This is true of receipts at Milwaukee, Cleveland, Cincinnati, and Omaha. In other markets the local produce or grain exchanges report as receipts all grain inspected inward by their inspectors, including small quantities not unloaded and forwarded. This is the case in Detroit, Toledo, and Kansas City. Other markets, such as Duluth, Minneapolis, Little Rock, and Louisville, make a strict distinction between purely local business, i. e., quantities actually unloaded at local elevators or warehouses, and mere car arrivals or quantities billed to local consignees. Equally varying are the practices of the different organizations in classing and reporting shipments, which in the case of Chicago and St. Louis include through shipments; in some cities all quantities forwarded or rebilled, even if not unloaded; and in other cities shipments out of local elevators and warehouses or from local wharves or piers. This lack of uniformity naturally results in a considerable degree of duplication and even reduplication, and this fact is to be borne in mind when comparisons between various markets are made.

GRAIN MOVEMENTS FOR CROP PERIODS.

In the following table an attempt is made to present grain movements at interior primary markets in such a manner as to permit of an intelligent study of the effect of each year's production upon such movements. While it is recognized that the selection of the same date as the beginning of the crop year for the various grains must be more or less arbitrary, owing to the appreciable difference in time and place of the maturing and harvesting of the different cereals, it is nevertheless believed that a given period may be used which, although both over and under lapping in certain instances, is comprehensive enough to answer all practical purposes, especially where figures representing movements for cumulative periods of two or more months are employed. To make possible, therefore, the presentation of such information in a single table, September 1 has been decided upon as the fairest arbitrary date marking the beginning of the common crop year.

II.—DOMESTIC COMMERCE OF THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between the domestic ports during the month of December and 12 months ending with December. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During the month of December, 1910, transactions at 75 ports of receipt and 112 ports of shipment were reported. The number of vessels arriving in December, 1910, was 2,040, and the departures numbered 1,790. The registered tonnage for the month was as follows: Arrivals, 2,077,310 net tons; departures, 1,573,613 net tons. This total does not include the tonnage of vessels engaged in trade between the United States and Canada.

SUMMARY OF DOMESTIC LAKE TRAFFIC, DECEMBER AND TWELVE MONTHS ENDING DECEMBER, 1908–1910.

A summary of the lake traffic for December, compared with the corresponding months in 1908 and 1909, is given in the following table. The various quantities and units of freight are reduced to their equivalents in short tons. December receipts in 1910 at all ports reporting were 1,337,224 short tons, compared with 3,419,102 short tons in December, 1909, and 2,111,015 short tons in December, 1908. The figures of shipments of coal include coal loaded for vessels' fuel consumption.

Comparative Summary of Domestic Lake Traffic, December and Twelve Months ending December, 1908–1910.

[1] Beginning with the year 1906, the ferry movement between Ashland and Washburn was treated as one round trip per month during the season of navigation.
[2] Includes tonnage of vessels carrying in-transit goods between Canadian and United States ports.

COMMERCE THROUGH THE SAULT STE. MARIE AND OTHER LAKE CANALS.

The United States engineer in charge of the Sault Ste. Marie Canal, Mich., reports that the United States canal was opened on May 5, 1910, 15 days later than in 1909, and that the Canadian canal was opened on April 12, 1910, 9 days earlier than in 1909. The United States canal was closed on December 14, 1910, allowing an open season of 224 days. The Canadian canal closed one day later, or on December 15, and, as it opened 23 days earlier, the season at this lock lasted 248 days. These waterways are the connecting links between the lower lakes and Lake Superior. Commerce and travel passing here consists primarily of through business. Passenger traffic is about equally divided in both directions; it amounted to 66,933 persons in 1910, 59,948 persons in 1909, and 53,287 persons in 1908.

Through freight westward by these passenger lines consists prominently of what is known as "package freight," or general merchandise for distribution at and through upper lake ports. These boats carry eastward large quantities of flour from upper lake and northwestern mills.

Westbound cargo freight consists chiefly of coal, this commodity comprising 89 per cent of the total westward traffic this season. Eastward cargo freight includes iron ore as the principal item, and flour, grain, and lumber.

Estimated Value of Freight, by Commodities, through Sault Ste. Marie Canals, 1892–1909.[1]

LAKE IN-TRANSIT MOVEMENT OF MERCHANDISE DURING 1909 AND 1910.

The following table presents the annual figures of the movement of freight, in bond, destined to or shipped from domestic ports on the Great Lakes, but passing through Canadian territory in order to reach its destination.

It will be noted that the figures of shipments are considerably in excess of the figures of receipts. This is due largely to the fact that eastbound bonded grain shipments from Chicago are relatively very heavy. This tonnage enters Canada at points on Georgian Bay, is transferred to the Canada Atlantic or Grand Trunk railways, and again enters the United States at northern New York or Vermont points.

There were received at the United States lake ports from these sources 64,880 short tons of freight in 1910, as against 79,654 short tons in 1909. Shipments from these ports through Canadian territory amounted to 268,744 short tons in 1910, in comparison with 248,008 short tons in 1909.

While the figures of the lake in-transit movement are included in those found in the tables representing the domestic commerce on the Great Lakes, they are believed to contain enough individual significance to deserve a separate tabulation.

GRAIN RECEIPTS AT SIX DOMESTIC SEAPORTS.

Below is given a comparative table of receipts of grain, including flour reduced to bushels, at six seaboard markets, during December and 12 months ending December, 1908, 1909, and 1910. The figures are derived in every case from the reports of the commercial organizations closely identified with the grain trade at the respective localities. These totals serve to show the relative share of each port in this branch of domestic commerce.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section usually includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coal shipments by water from New York, Philadelphia, Baltimore, Norfolk, and Newport News to seaboard points north and south; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from sources of origin, and coastwise and foreign shipping movements at Boston, New York, Philadelphia, and Mobile. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented. Coastwise shipments of petroleum from Texas producing territory to Atlantic and Gulf ports are given in Section VIII. Representative freight rates quoted to leading destinations on the eastern and southern coasts are shown in Section IX.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, AND NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the Middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk, and Atlantic, Gulf, and Pacific coast ports the following figures of the coastwise coal movement have been obtained. These statistics cover probably more than 90 per cent of the shipments for the places and periods mentioned, and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia, shipments are primarily bituminous and secondarily anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio rivers and east of the Mississippi River and that portion west of the Mississippi included in the States of Louisiana, Oklahoma, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities.

Cotton reports include the statements of the quantity of the crop ginned, brought into sight, and its disposition during successive crop years to the end of August. Other articles of traffic reported are the grain and rice movements at New Orleans, shipments of yellow pine from the Southwest and from Virginia and the Carolinas to destinations, and river and rail traffic at Louisville, Ky., and Little Rock, Ark. Southern river trade is given in Section VII, southern coastwise shipments under Section IV.

Report on Cotton Ginning.

Number of bales of cotton ginned from the growth of 1910 prior to January 16, 1911, and comparative statistics to the corresponding date in 1910 and 1909; crops of 1909 and 1908; and the per cent of the crop of each year ginned prior to January 16.

[As reported by the Bureau of the Census.]

The statistics in this report include 110,815 round bales from growth of 1910 prior to January 16; 146,378 from that of 1909; and 232,510 for 1908. The number of sea-island bales included is 86,411 from growth of 1910 prior to January 16; 92,191 from that of 1909; and 90,287 for 1908. The distribution of the sea-island cotton from growth of 1910, by States, is: Florida, 28.782; Georgia, 45,436; and South Carolina, 12,193. The statistics in this report are subject to slight corrections when checked against the individual returns of the ginners being transmitted by mail. The corrected statistics of the quantity of cotton ginned this season prior to January 1, 1911, are 11,084,515 bales.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac rivers for shipment direct to northern and eastern mills; and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; redwood-lumber shipments from upper California; arrivals of redwood, pine, and fir at California coast points; lumber shipments from the Pacific Northwest States and from principal northern Pacific ports; commerce at the ports of Portland, Seattle, and Tacoma; and the shipments of citrus fruit from southern California.

Arrivals of Redwood, Pine, and Fir at California Points for Periods Specified, and by Years, 1903–1910.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburg, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island Dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi rivers; the traffic movements on the Delaware and Chesapeake Canal, connecting the Chesapeake and Delaware bays, and similar movements on various navigable streams about whose navigation acceptable information is periodically available.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and departures are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For the 12 months ending with December, 1910, of the vessels reported, 1,165 were loaded with coal; 400 carried lumber, logs, piling, and wood; 203 carried ties; 212 carried merchandise; 15, brick; 35, oil; 14, steel; 10, wheat; 8, corn; 77, rock; and 2, molasses.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing downstream through Lock No. 3, plus 68,355 short tons mined in the first and second pools, makes a total coal traffic of 757,115 short tons. This total, plus 10,742 short tons of miscellaneous merchandise which passed through Lock No. 3 during the month, represents approximately the general aggregate of downstream traffic during December, 1910—767,857 short tons.

The total freight moved in both directions, on this basis of calculation, was 847,641 short tons in December, 1910, as against 940,647 short tons in December, 1909, and 740,580 short tons in December, 1908.

For twelve months ending with December the total movement was 10,896,030 short tons in 1910, 11,456,392 short tons in 1909, and 9,578,473 short tons in 1908. Of upstream freight, that passing through Lock No. 1 represents approximately the general movement in this direction. The upstream freight passing this point for 12 months ending December amounted to 1,329,919 short tons.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, and petroleum; also figures of pig-iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke shipments east of Pittsburg and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore & Ohio Railroad, the Chesapeake & Ohio Railway, the Norfolk & Western Railroad, and other eastern roads; weekly Connellsville coke output and shipments; St. Louis receipts of coal. Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima-Indiana, and Mid-Continent fields. Statistics of pig-iron production cover the principal producing districts, and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

The following table shows the quantity of bunker coal supplied to all classes of vessels at lake ports during the past calendar year as compared with figures for the preceding three years. These data were compiled from the individual reports to this bureau of concerns engaged in bunkering operations during those years. Data for some of the ports are incomplete, for the reason that a number of firms have failed to supply the bureau with the desired information. A comparison of the figures as given in the table below with the bunker-coal figures collected by the bureau through official agencies reveals large differences in favor of the trade figures, which are accounted for by the fact that the bureau figures do not include the quantities of coal supplied to vessels in the harbor and neighborhood trades, nor to Canadian vessels in the Canadian home trade. Taken as a whole, the concerns applied to have furnished full information regarding their operations for the past year; in a number of instances, however, reports could not be obtained. Rather than estimate the quantities for the respective ports, the partial totals are given. It is believed, however, that these figures come within 90 and 95 per cent of the operations involved.

FUEL CONSUMPTION BY STEAMERS ON THE GREAT LAKES DURING THE CALENDAR YEARS 1907–1910.

STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MID-CONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Mid-Continent field includes Kansas and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude from southeastern Ohio, and Lima-Indiana crude from northwestern Ohio; the Indiana Pipe Line Co., which receives crude from Indiana and Illinois; and the Prairie Oil and Gas Co., which operates in the Mid-Continent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude, and its Lima-Indiana crude was reported jointly with that of the Indiana pipe line. Also, prior to this date, the pipe line distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and for which they are liable. In addition, the pipe lines hold a certain amount of sediment and surplus oil, which, combined with net stocks, constitute gross stock.

X.—OCEAN FREIGHT RATES.

The monthly range in ocean freight rates on staple products for comparative periods of two years, between important Atlantic and Gulf ports and Europe, is shown in tables for Boston, New York, Baltimore, and New Orleans. In the Baltimore table, unless otherwise specified, rates in United States currency are in cents per 100 pounds, and those in English sterling per long ton of 2240 pounds.
